

Fuuz™ from MFGx Warehouse Management System

Manufacturers need an accurate count of warehouse inventory from raw materials to finished products to shipping data. And they need to monitor inventory status quickly and cost effectively.

The WMS solution from Fuuz delivers real-time visibility into material throughput so that manufacturers can streamline and scale warehouse operations to fit their unique industry requirements.

Functionality

The Fuuz WMS solution provides the functionality and efficiency manufacturers of all sizes need. It delivers:

- Purpose-built WMS solution and apps unique to each manufacturer
- Full real-time visibility into logistics management
- Connectivity among all devices, scanners, label printers
- Management of SKUs, inside warehouse locations and across multiple warehouses
- Mobile applications for warehouse floor processes such as inventory management, RFID tracking, document production, label printing, scale integration and more
- Rules/notifications for warehouse processes such as picking, packing, shipping and more
- Automated and real-time documentation

Fuuz™ is a cloud SaaS solution developed by MFGx, a Michigan-based software integration company, to connect multi-platform enterprise software, industrial equipment, operating systems, people and processes. For more, visit <http://www.fuuzplatform.com/>.
